

## Compatibility of DES PV Inverters with SMA PV Offset box

The SMA PV Offset Box, PVO-11 can be used in combination with DES transformer less string inverters. This compatibility declaration will only be valid if installation's instructions of both products have been fully respected.

When TL inverters are used with two separate MPPT, as described into PV Offset Box installation manual, each strings must be have his own PV Offset device. In one tracker working mode, the DC+ and DC-, of the both DC inputs must mandatory been interconnected. The inverter will not be damaged by the PVO-11 and vice versa.

DES declines any responsibility for the overall function of the PV installation, especially in respect to PID effect, this remains the sole responsibility of the engineering & installation company.
